

Applicants respectfully submit that in this case, the Examiner has not shown that there would be a serious burden in examining the Groups set forth in the restriction requirement. In particular, Applicants note that it appears that the search for Groups III and VII would be co-extensive. It appears that a search covering the subject matter of Group III would cover the subject matter of Group VII as well since these two groups encompass overlapping subject matter; that is, a antagonist anti-EphB4 antibodies and methods of using same. Thus, Applicants respectfully submit that the inventions of Groups III and VII can be efficiently searched and examined together without placing a significant additional burden on the Examiner.

Based on these reasons, Applicants respectfully request that the restriction requirement, at least with respect to Groups III and VII, be withdrawn.

### CONCLUSION
